

Feed Supplier Directory

~ A work in progress brought to you by Certified Naturally Grown ~

To meet the Certified Naturally Grown standards, livestock feed must be grown without synthetic chemicals or post-harvest fungal treatments and must not contain GMOs, treated seeds, medications, or animal byproducts.

Feed that meets all of these requirements can be difficult to find or expensive to ship depending on your region. Below, we've assembled some resources to help you find feed suppliers, and a list of feed suppliers that our current members use. Please note, this is a work in progress, and is by no means exhaustive. If you know of another feed supplier, get in touch. Please help us expand our list!

Feed Suppliers

Below, is a list of some feed suppliers that our members use. It organized by state, roughly from north to south.

Green Mountain Feeds (VT)

- Organic bagged feeds for Dairy, Swine, Poultry, Sheep and Goats.
